One-page build sheet

2021 Toyota GR Supra A91 Edition

Refraction Blue · Street performance and gloss carbon

Performance	Turn In Concepts fitted the AMS Performance catted downpipe, Dinan carbon intake and turbo inlet, JB4 Pro (Map 2), and Dinan valved cat-back with black tips.
Monitoring	P3 vent gauge with a BMS CANbus adapter to resolve the diagnostic-port conflict with the JB4.
Carbon order	RebuildingWorks RW3 duckbill and OE door garnish in gloss twill wet carbon. Pre-preg pieces included the center console cover, door switch panel, shift knob side cover, wind buffers, and shift knob cover.
Paint protection	Invizashield in Milford, Ohio installed paint protection film. KMW Detailing applied the ceramic coating.
Build priorities	Preserve street drivability, keep catalyst monitoring in place, and retain a quieter exhaust setting.
