One-page build sheet

1993 Nissan 300ZX Convertible

Z32 · Owner-commissioned twin-turbo conversion · Bought back in 2026

Original build · 2012	We bought the convertible and took on the twin-turbo swap. Brett Ramey built the engine with Wiseco pistons, Eagle rods, Z1 600 turbos, 615 cc injectors, and a Selin dual intake.
Tune · 2012	SpecialtyZ tuned the car. The historical dyno entry lists 448 hp and 446 lb-ft on 93 octane.
Brakes · 2012	The original build included 14-inch Akebono brakes front and rear to match the added twin-turbo power.
Sale · 2019	After we sold it to Paul Williams in Virginia in 2019, he restored the exterior and cabin. Work included repainting, a new top and weatherstripping, an OEM twin-turbo front bumper, and timing-belt service.
Buyback · 2026	We bought the same car back from Paul at about 56,000 miles.
