2021 Toyota GR Supra A91 Edition

Refraction Blue · Seller documentation

Listing description draft

This 2021 Toyota GR Supra A91 Edition was sourced in Refraction Blue from Isringhausen Imports. Turn In Concepts performed the documented performance work in September 2026. The setup pairs an AMS catted downpipe with a Dinan carbon intake and turbo inlet, a JB4 Pro running Map 2, and a Dinan valved cat-back exhaust. Exterior changes include a RebuildingWorks duckbill and door garnish. Invizashield installed paint protection film and KMW Detailing applied ceramic coating.

Build and service record

Vehicle and sourcing	2021 A91 Edition in Refraction Blue. Retain the factory window sticker or equivalent documentation to confirm original equipment and options.
Airflow and exhaust	Turn In Concepts fitted the AMS Performance catted downpipe, Dinan carbon fiber intake and turbo inlet, and Dinan valved cat-back exhaust with black tips.
Tune and monitoring	JB4 Pro, Map 2. A BMS CANbus adapter resolved the documented diagnostic-port conflict between the JB4 and the P3 vent gauge.
Exterior and cockpit	RebuildingWorks order: RW3 duckbill, OE door garnish, center console cover, door switch panel, shift knob side cover, wind buffers, and shift knob cover. The order includes wet carbon and pre-preg pieces. Separately, the project records list blue magnetic paddles, stripe graphics, and reflector overlays.
Paint protection	Invizashield in Milford, Ohio installed the paint protection film. KMW Detailing applied ceramic coating.
Power documentation	Toyota’s factory rating was 382 crank hp. No post-install dyno result appears in the build record.

Evidence to gather and check

Records to attach when available

- Turn In Concepts repair orders 6204 and 6276 for the September performance work.
- RebuildingWorks order and finish list for the seven carbon pieces.
- Original dealer listing and owner photos showing the finished car. Gather the PPF and coating receipts and verify exact film coverage before describing it.

Confirm for this car before submitting

- Check the current tune setting, fuel requirements, active codes or warning lights, and applicable emissions test history.
- Photograph the downpipe or related records where practical, plus the carbon, cabin details, film edge condition, wheels, tires, and any imperfections.
- Confirm current mileage, date and mileage of the latest service, and which stock parts are included.

Prepare the submission

- Take current photos of every angle, the odometer, engine bay, interior, underside, and visible flaws. Use real photos with no AI alterations.
- Cover or redact addresses, private contact details, payment information, and other personal information on service records before submitting images. Send title paperwork through the platform's verification flow.
- Keep a current list of known problems, accident or paintwork history, and included keys, manuals, documents and spares. Verify title status and any lien before submitting.

For Bring a Trailer, copy and adapt the description after checking current condition. The initial photo uploader accepts JPEG and PNG. Use that uploader for original car photos and redacted record images. Keep this PDF as your reference packet. Bring a Trailer submission form · Photo guide
