2025 BMW X5 M Competition

Dravit Grey · Seller documentation

Listing description draft

This 2025 BMW X5 M Competition in Dravit Grey was sourced through Jaguar Land Rover Fresno. BMW of Cincinnati North coordinated the project. The fitment correspondence records Dinan 12 mm front and 15 mm rear spacers with 818M wheels. KMW Detailing applied ceramic coating. The parts and correspondence below identify work confirmed in the file, items ordered or specified, and the proposed wheel setup.

Build and service record

Sourcing	2025 X5 M Competition in Dravit Grey. Confirm interior upholstery, factory options, and original equipment against the window sticker.
Documented fitment	818M wheel dimensions and Dinan spacer sizes yield effective offsets of ET19 front and ET28 rear. Spacers are 12 mm front and 15 mm rear.
Performance plan and orders	The CarBahn spec listed the S68 Stage 1 controller, high-flow filters, a stud-and-nut conversion kit, and a factory-matching warranty quote. The Dinan D660-0103 X-pipe was ordered to the installer.
Suspension and aero orders	CarBahn height-adjustable kit with requested drop of 1.3–1.4 in. front and 1.2–1.3 in. rear. Maxton orders included the splitter, side diffusers, rear splitter and spoiler cap. Zunsport center grille was ordered for radiator protection.
Exterior care	Ceramic coating by KMW Detailing. The build story shows owner photos taken after the coating.
Proposed wheel package	BC Forged HCA674 concept: 21 × 10.5 ET19 front and 22 × 11.5 ET28 rear. The proposal calls for retaining the tire sizes. The owner photo shows the dark wheels on the car.

Evidence to gather and check

Records to attach when available

- Dealer listing and owner photos of the early and finished car. Use current photos to show the condition at sale.
- Installer correspondence on height targets, hardware and fitment, plus order records for CarBahn, Dinan, Maxton Design and Zunsport.
- KMW Detailing coating documentation and wheel-fitment correspondence. Keep the wheel proposal with planning records.

Confirm for this car before submitting

- Inspect and confirm which performance, suspension and exterior parts are currently fitted. Record the actual ride height and any alignment or service evidence.
- Confirm wheel and tire sizes, date codes, tread depth, spacer installation, and wheel or tire damage.
- Describe any tune, exhaust or emissions changes, current warning lights, remaining warranty terms, and what parts are included.

Prepare the submission

- Take current photos of every angle, the odometer, engine bay, interior, underside, and visible flaws. Use real photos with no AI alterations.
- Cover or redact addresses, private contact details, payment information, and other personal information on service records before submitting images. Send title paperwork through the platform's verification flow.
- Keep a current list of known problems, accident or paintwork history, and included keys, manuals, documents and spares. Verify title status and any lien before submitting.

For Bring a Trailer, copy and adapt the description after checking current condition. The initial photo uploader accepts JPEG and PNG. Use that uploader for original car photos and redacted record images. Keep this PDF as your reference packet. Bring a Trailer submission form · Photo guide
